## New partnership in North America

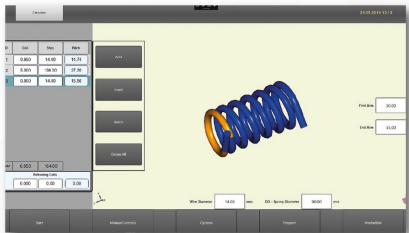

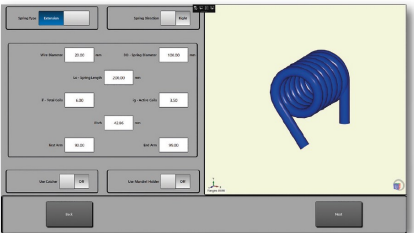

Fortuna Federn GmbH announced their new partnership with **Coiling Equipment LLC** based out of the greater Chicago area. Coiling Equipment is the exclusive distributor for Fortuna Federn in North America. **Al Uzumcu**, President of Coiling Equipment, has an extensive background in engineering, CNC machining and manufacturing. **Gerry Wright**, Sales Manager, brings many years of technical and industrial sales experience with a focus on customer service. Al Uzumcu says “It is Coiling Equipment’s goal is to work closely with our customers in order to offer the best solution for their spring making needs and provide outstanding aftersales service and support to keep their machines productive year after year”.

## 2019 SMI Metal Engineering Expo

Fortuna Federn and Coiling Equipment had a very successful show at the SMI Expo in Pittsburgh, PA. We met with spring manufacturers from across the U.S., Canada, Mexico and South America.

Goran Fofonjka, GM of Fortuna Federn GmbH, said that the SMI Expo was a great way for our current and potential customers to meet Al and Gerry and discuss how they can help with their spring manufacturing challenges.

The SMI Expo provided an opportunity to listen our customer’s needs and highlight the machines that would provide the best solution. Attendees were also interested to learn about the Spring Designer 3-D Software for fast and easy set-up. Increased productivity and efficiency are more important than ever before.
