# Are you looking for versatility?

## Consider WIM-CNC Spring Lathe Coiling Machines

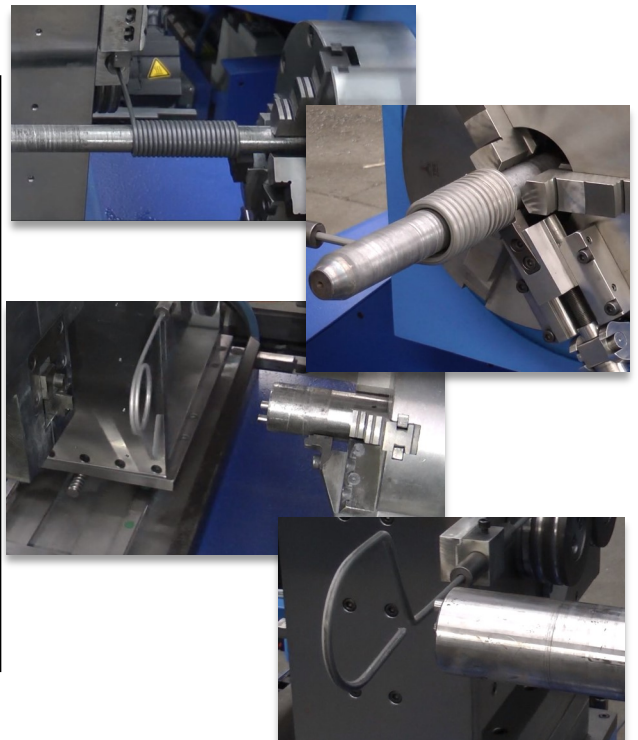

## WIM-CNC machines offer many production possibilities

Very versatile, quick programming and increased productivity — this is what the WIM-CNC Spring Lathe Coiling Machines can do for you.

### WIM-CNC machines can make:

- Right and left coiled cylindrical springs
- One sided conical springs (with 4Ax and 5AX systems)
- Compression, extension and torsion springs
- 2-D wire forms and bends on spring legs (with 4Ax and 5AX systems)
- Double torsion springs (on request only)

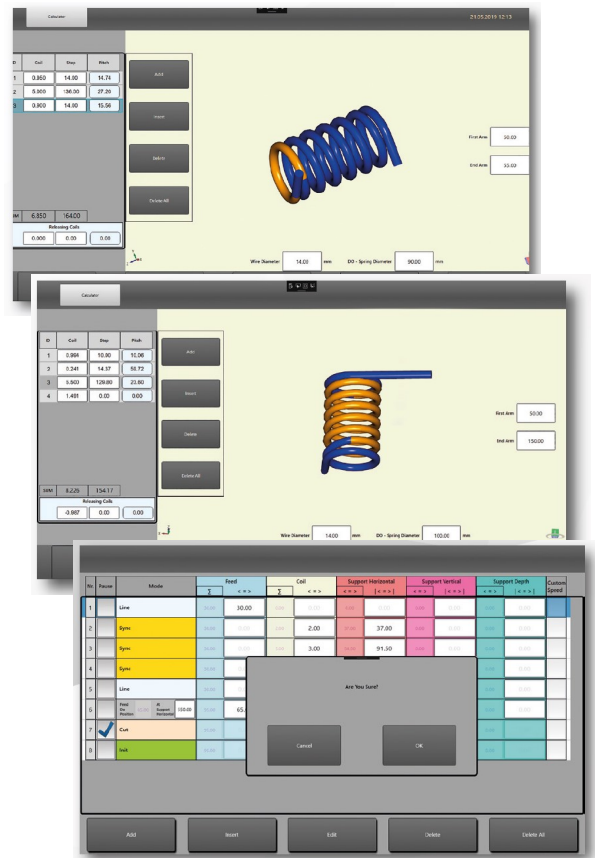

Coiling Equipment LLC, 872 S. Milwaukee Ave. #163, Libertyville, IL 60048 — Phone: 847-910-7348

# Fast and Easy Set-up

## WIM-CNC Spring Lathe Coiling Machines

### WIM-CNC Spring Designer 3D Software:

- Available on 4AX or 5AX systems
- Operator training time is minimized with user friendly interface
- Spring template wizard tool enables machine set-up from blue print to production in 3 easy steps
- Takes less than two minutes to create a new spring program ready for production
- Each spring program can be saved by name and with a detailed description
- Software learns with each program or wire form

## Many machines and options are available

Contact us to discuss your spring and wire form needs so that we can match your company with the best WIM-CNC machine, options and tooling for your operation.
