Productivity is the key

Beyond supply chain issues, productivity is a key concern of spring manufacturers today. Questions you might have are:

- **Can spring programs be load quickly and accurately**
- **Is there a steep learning curve for the operator?**
- **Is it easy to use and maintain?**
- **Will a new machine increase overall productivity?**

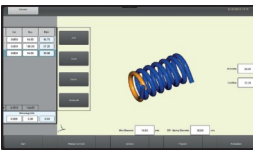

WIM-CNC Lathe Spring Coilers

Fast Programming

Spring Designer 3-D software enables the user to set up the machine fast. The 3-D model preview instantly shows changes in the spring program.

Programming is fast and accurate. The large control panel makes control easy and intuitive.

Intuitive

The Spring Template Wizard Tool is intuitive to use that will minimize operator training time.

WIM-CNC machines can produce compression, extension and torsion springs as well as different wire forms.

Easy to Use

The Wizard template enables the machine set up from blue print to production in 3 steps.

Highly Versatile & Very Productive

Depending on your needs, there is a WIM-CNC machine for you. From compression and extension springs to torsion springs and different wire forms. Machines range from 2 axis up to 5 controlled axis. This gives flexibility for higher productivity, production of different 2D wire forms and bends on the spring legs.

OBW / MPK Spring Loopers

Great Utility

Manual Spring Looper

OBW-2: Wire Diameter 0.8 mm to 2 mm

Electric Spring Loopers

OBW-4 Wire Diameter 2 mm to 4 mm

OBW-6 Wire Diameter 3 mm to 6 mm

OBW-8 Wire Diameter 4 mm to 8 mm

Hydraulic Heavy Spring Loopers

MPK-12 Wire Diameter 5 mm to 12 mm

MPK-16 Wire Diameter 7 mm to 16 mm

MPK-20 Wire Diameter 8 mm to 20 mm

Upcoming Events in 2022

**June 20th — 24th
2022**

Visit Fortuna Federn at the largest trade show in the industry.
